

What is STAR+PLUS?

STAR+PLUS is a Texas Medicaid managed care program for people who have disabilities or who are elderly. The program provides health care and long-term services and supports, such as help in your home with daily activities, home modifications, and personal assistance services. These services are delivered through a health plan (HMOs).

STAR+PLUS includes service coordination, which provides a person or team to work with you, your doctor, and your health plan to get all of the services you need.

Most adults on supplemental security income (SSI) will be required to enroll in STAR+PLUS.

SSI children may choose to enroll in STAR+PLUS or may remain in traditional Medicaid.
